SURYA PRAKASH INUKURTHI

+91 9533551895 ◇ Nellore, Andhra Pradesh-524004
isuryaprakashh@gmail.com ◇ linkedin/isuryaprakashh ◇ github/isuryaprakashh ◇ suryaprakash.me

OBJECTIVE

Aspiring Software Engineer with strong skills in AI and web development eager to contribute to innovative, impactful projects through technical excellence and creativity.

EDUCATION

BTech. in Computer Science & Engineering, KL University, Vijayawada 2023-27
Specialization: AI Systems for Visual Intelligence **CGPA**: 9.60/10

SKILLS

Languages	Java, Python, JavaScript, SQL, HTML,CSS.
Frameworks & Libraries	React.js, Spring Boot,PyTorch.
AI/ML	Deep Learning, Computer Vision, RAG, LLMs.
Tools	Git/GitHub, Vs Code, Eclipse, HPC/Cluster Computing, Linux.

PUBLICATIONS

Enhanced Visual Understanding using Deep Learning based on Scene Classification 2026
IEEE Xplore, INDIACom 2026
https://ieeexplore.ieee.org/document/11525589

- Presented research findings on scene classification using deep learning techniques for enhanced visual understanding.
- Explored and evaluated ANN, CNN, and ResNet-based models for scene recognition and image classification.
- Compared model performance across multiple scene categories to analyze classification accuracy.

PROJECTS

Scene Classification System | Python, PyTorch, Flask *Nov 2025 – Mar 2026*

- Trained a ResNet-18 transfer learning framework alongside CNN and ANN models for multi-class classification, achieving a peak validation accuracy of **95.94%**.
- Leveraged the university's HPC cluster with multi-GPU compute nodes to train deep learning models on a Linux-based environment, executing distributed training workloads and managing datasets, training jobs, and model evaluation for faster experimentation. [GitHub]

Hirevexa – AI-Powered Hiring Platform | React.js, Flask, Gemini, Ollama *Oct 2025 – Feb 2026*

- Architected a unified recruitment pipeline consolidating automated resume parser shortlisting, live screening environments, and automated quantitative candidate appraisal reports.
- Programmed an adaptive hybrid AI engine that hot-swaps parsing logic between cloud-hosted Gemini models and local Ollama deployments to manage throughput and minimize latency.
- Integrated RAG-powered vector search mechanisms to support semantic recruiter chat interactions querying candidate context databases. [GitHub] | [Live]

ASTHETICA – Online Art Gallery | React.js, Spring Boot, MySQL *Jan 2025 – May 2025*

- Developed a responsive frontend using React.js to deliver an intuitive and interactive user experience.
- Built secure and scalable RESTful APIs using Spring Boot to handle authentication, artwork management, and business logic.
- Integrated MySQL as the relational database for efficient storage and retrieval of user, artwork, and transaction data. [GitHub] | [Live]

CERTIFICATIONS

- Git Foundations Certification
- Cambridge Linguaskill English Proficiency Certification

LEADERSHIP & ACHIEVEMENTS

- **Core Member** – Aprameya (AI and Autonomous Systems Club), KL University
  Developed the official Aprameya club website to manage events, announcements, and club activities. Collaborated with team members in organizing and participating in hackathons, including Smart India Hackathon (SIH) and AI-focused competitions.
